### Weighing and Measuring

Here are two diagrams of a block of margarine. They weigh 250g each.

- (a) On diagram A, mark how to divide the block into 25g without using scales.
- (b) On diagram B, mark how to divide the block into 12.5g without using scales.

What would you use to weigh and measure the following ingredients?

- (a) 5mls mixed spice\_\_\_\_\_
- (b) 250mls milk\_\_\_\_\_
- (c) 200g caster sugar\_\_\_\_\_
- (d) 25g block margarine\_\_\_\_\_
- (e) 45mls syrup\_\_\_\_\_
- (f) Salt\_\_\_\_\_
- (g) 150g pasta\_\_\_\_\_

Use the following list to help you :-

Kitchen scales, measuring spoons, sieve, pinch, measuring jug,  
Handy measure, grater, chopping board.
