

Dalkeith High School Pathways Music

Why chose Music & Music Technology:

Music and Music Technology are both regarded as important creative subjects for many reasons. Music helps to develop cognitive and processing skills in unique ways through the development coordination and reading. It also shows control and commitment to learning an instrument and a new language accessible to all. Music Technology helps teach about sound manipulation and the different ways software can be used in many contexts from game design to live sound production - something we are exposed to everyday of our lives.

Potential Careers:

- | | |
|---------------------------------------|----------------------------------|
| - Teacher | - Professional Musician |
